

Installing the 7" Headlamp Bucket from CafeRace

The 7" headlamp is indeed old-school. It uses clips (provided in the package) to attach the H4 headlamp to the trim ring before connecting to the bucket. It can be a little confusing to realize you have to bend up those clips (requiring needlenose pliers in most cases.)

A picture, being worth exactly 1000 words, we present you, fair customer, the following 4000 word dissertation.

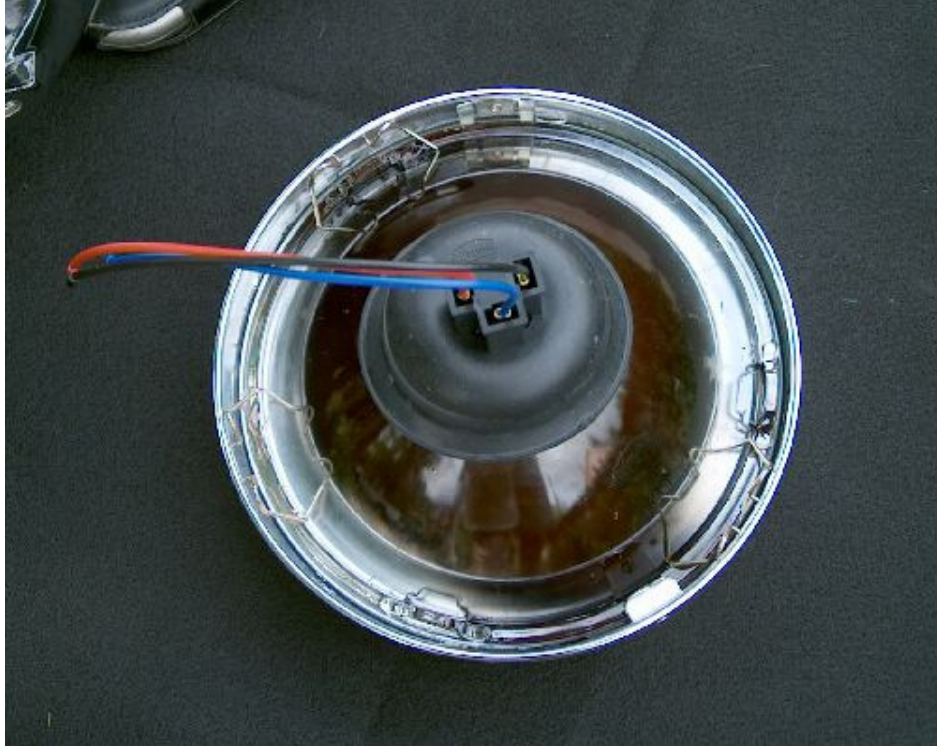

Empty Bucket with Trim Ring

Bucket, trim ring & H4 Lamp

Connecting the lamp and the trim ring via the provided clips:

A Close-Up – bend that steel to your will!

Voila!

Now you may ride fast, take chances and revel in all of your diminishing liberties with the lights on.
